

12 Years Old House Music Producer GabZ House Guru from London

My name is Gabriel Zaba and I started to make my own tracks at the age of 11. I always had a thing about music, I had always been picking up on the melody and was playing it in my head all the time because I couldn't get over it. I listened to Joel Corry, Mk and Sonny Fodera as their music were the biggest inspiration for my own music.

My album mainly will be focused on Future house/ Edm genres, but also few of my productions are for big room/tech house fans 😊 "Been looking 4 Luv" is my newest production with this energetic beat, great for a summer.

I believe that even if I don't have sound engineering background (because I'm 12), the concept and arrangement of my tracks defend themselves. Do you feel the same? If yes, I invite you to listen to my productions on all my digital streaming platforms (YouTube, Instagram, Spotify etc).
