

With over 400K streams on his EP Kale Chips in 2022, multi-instrumentalist and Producer Spreadsheets returns with his latest track 'Serious'. Far away from the madding crowd and working in the recording studio, Spreadsheets has been making his own brand of House that resonates with audiences everywhere.

'Serious' is reminiscent of early Disclosure as it delivers sensuous beats over a progressive hook that will get the dancefloor moving. Textured and multi-layered, it is a journey into the finer regions of Deep House, Melodic, and Tech driven sounds. Exquisitely crafted with undertones that will catch afire in the soul, the energy it generates is beyond the reach of most modern-day producers.

'Serious' is perfect for those curators that want to add that touch of excellence to their compilations. With the song in your playlist, you will welcome a whole new audience to your fanbase. Expanding the minds of audiences always searching for the next big thing, Spreadsheets is redefining the way they interact with dance music. Make some Noise. This is Serious. Spreadsheets has arrived.
